I am a self taught web developer that start developing website since 2009, since then mastering web development technology is my primarily focus until now.

In the early days since my main interest in web technology, I started to work as a freelance web designer and developer in Bali, Indonesia. My clients varies from individual to corporate levels, and spreads across Bali-Indonesia and some in The Netherlands and New Zealand.

*And in the mid of 2011, I have decided to learn something new and my choice are goes to **Python / Django framework** as my main web development tool and since then my day-to-day job are working extensively with Django.*

And now, my working experiences includes:

Back-end

- *General Python/Django development.*
- *RESt API implementation with Django Tastypie.*
- *Advance Search implementaion with Django-Haystack.*
- *Redis Implementaton.*
- *Celery tasks + Redis as Broker.*
- *Elasticsearch.*
- *Gevent-Socketio realtime server.*

Front-end

- *jQuery / jQueryUI.*
- *Require.js, Backbone.js.*
- *CSS / CSS3.*
- *LESS.*
- *Socket.io.*

Deployment

- *Apache/Mod_wsgi*
- *Nginx.*
- *Gunicorn.*

Others

- *Some Python / QT4 Experiences.*
- *PHP.*
- *Wordpress development (Theme / Plugin).*

- *Basic Java / Android development.*
- *Basic Node.js / Express Framework.*
- *Django testing / Nose (Unit Test + Integration Test).*
- *GIT version control.*

But I think my main skill is always willing and passionate to learn something new, no matters if its a languages, tools, best practices etc.

Skills	• Python	• Django	• Google App Engine
	• Celery	• Redis	• Gevent + Socket.io
